How an MRI Office Saves Several Hours a Week
When Importing Social Networking Profiles to PCRecruiter

> *eGrabber took the time to understand our concerns and the unique characteristics of our recruiting business. Accordingly, they have made necessary changes to their software to ensure the quality of data transferred into PCRecruiter. Using ResumeGrabber we have cut down the amount of time to get resumes into our database by 75%. I now endorse and gladly recommend ResumeGrabber to import resumes into PCR.*

> TopGrading Solutions

Part of the MRINetwork, TopGrading Solutions (TGS) is a leading executive recruiting firm that adds at least 350 contacts with resumes to its PCRecruiter database each month. TGS's admins import profiles from Social Networking Sites and Job Boards by **manually** entering information and saving each resume into their PCR Rollup list. Moreover, the imported Social Networking profiles often have missing information, making the process even more time consuming. Admins have to search for all missing information, add the contact/resume to a company record and finally aggregate all of this for a Rollup List, a process taking at least 2 hours for only 30

Jason Breault, the Managing Director and Co-Owner of TGS, knew something had to change. After trying ResumeGrabber, he was impressed with the product's ability to instantly import contacts and resumes into PCR. He found the dupe-check feature especially powerful, as it made sure he wasn't adding duplicate contacts into PCR.

Because **ResumeGrabber** can automatically import Social Networking profiles to its grid, contact information can be

easily added or modified. It will even fill in missing fields with the correct information retrieved from a candidate's company record.

> Now that I use **ResumeGrabber**, I can import all the names that we save into the ResumeGrabber grid, enter their contact information all in one shot (which most is already populated by ResumeGrabber) and then in one click, send them all over to PCR. This product has cut my resume importing time in half, which to me is worth a great deal!

> TopGrading Solutions

In the end, TopGrading Solutions found a tool that:

- automatically imports resumes from Job Boards and Social Networking Sites into PCR, saving each admin 3 hours per week
- reduces routine work and allows for more productive tasks

ResumeGrabber JobSuite completely automates resume import, resume screening and transfer of resumes to PCR.
